clarifai
The World's AI™

MISSION TESTED AND TRUSTED AI

Accelerate Your AI Readiness

Schedule a Complimentary Consulting Session

Take advantage of a free 30-minute consulting session with a Clarifai solution engineer specialized in implementing AI in government agencies. We will help you identify the different ways AI can be used to deliver better mission outcomes.

Learn about the different applications of AI and the rapid, positive outcomes that it delivers.

In this session:

- Outline your goals and objectives
- Discuss how AI can help accelerate your projects
- Review actions to be considered
- Establish next steps

Contact us to schedule your session.

Let Clarifai help you integrate AI into your mission workflows.

Clarifai helps you transform your data into decision advantage

Clarifai is an end-to-end artificial intelligence and machine learning platform. We've worked with the Department of Defense and government agencies to seamlessly integrate AI and machine learning capabilities into critical mission workflows.

We enable our public sector partners to leverage their unstructured data to solve complex readiness, intel and labor-intensive manual problem sets. Clarifai has top secret security clearance and cleared personnel.

Use cases and past performance

Satellite data analysis and broad area search
Scan large geographical areas for objects or events of interest. [USDI Maven, Army TITAN}

Full motion video analysis and tagging
Conduct near real time analysis of multispectral full motion video via remote or edge video feeds. [USDI Maven]

Automated data labeling and annotation
Use model predictions to automatically label input upon ingestion. [contract pending]

Collected exploited materials
Extract, translate and analyze usage of seized physical and digital documents and media. [DOMEX CEM Mission Command UDSI, Canva, Wattpad]

Visual inspection predictive maintenance
Detect degradation of capital equipment to prevent further degradation or unplanned outages. [AFWERX]
